Re: Solvay Groundwater Sampling at Matteo & Sons, Inc. Superfund Site, West Deptford, New Jersey

Dear Dr. Goodrum:

It has come to the attention of the U.S. Environmental Protection Agency ("EPA") that your company accessed monitoring wells on the Matteo & Sons, Inc. Superfund Site ("Site") in West Deptford, NJ to perform groundwater sampling related to an investigation of PFAS compounds in groundwater in the West Deptford area.

EPA maintains strict access protocols to Superfund sites and my understanding is that you did not go through the proper channels to obtain access to the Site. Future requests for access should be submitted in writing to EPA. Additionally, any future testing conducted at the Site will need to be monitored by EPA.

EPA kindly requests you to send copies of all field notes, data logs, analytical data with any validation reports, field sampling logs, work plans, quality assurance plans, quality control plans, along with any other documents or notes generated in relation to the testing conducted at the Site. You may direct these documents to my attention at the following address:

Thomas Dobinson, P.E.
Remedial Project Manager
Superfund and Emergency Management Division
New Jersey Remediation Branch
U.S. Environmental Protection Agency/Region 2
290 Broadway, 19th Floor
New York, NY 10007-1866

If you have any questions regarding this matter or if you would like to discuss this matter with EPA, please feel free to contact me at (212) 637-4176.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas Dobinson", is written over a horizontal line.

Thomas Dobinson, PE
